Core features 143 sentiment +0.93

"I picked it up because I wanted to keep some notes, and didn't think much of it. But it's so deeply customizable that I got basically hooked on it. I have tons of different sections for lots of different things, and it's made me much more organized as a person. I use it daily and it genuinely makes my life so much easier. It makes me so happy to use and you can use it for an..."

"It's the most epic thingy OAT. So simple and easy. So much better than Apple Notes!!"

App Store · ★★★★★ · 2026-06-15 · conf 94%

"This application is a dream come true. For the longest time I have used products that were complicated or difficult to use. Notion in a few short moments dispelled those unpleasant memories. The app is quick and easy to use and has templates like scheduling etc. As I type this review from my bed as I prepare for the day Notion has become my constant companion."

"i'm so done with ai slop being shoved down our throats in every corner of the internet. there's no reason why notion should need ai integrated into its app. you don't want to spend the time writing original content? fine, use chatgpt. this app used to be so nice circa 2019, now it's turning into every other lazy website."

App Store · ★ · 2026-10-06 · conf 100%

"It was great before they put all their AI features front and center. Now I have to play whack a mole to get rid of them all because surprise, I actually wanted to create pages and write them myself."

💡 Feature Request I am a pay user of Notion, since this app launched. For me, is the best tool i have ever use to manage my live. The only think i miss to be as complete as posible, is a whiteboard. As other apps like Notion has, for example: fibery. It would be awesome."

"I moved away from Notion two years ago as well, yet after reading reports about native support and a smoother experience, I returned— though honestly, little has shifted. The same sensation from two years ago persists. The only app that presents the Getting Things Done technique is the Things app."

"I was really frustrated I couldn't access my pages without an internet connection in the grocery store today. Also the way they've jammed AI into the app where it doesn't help at all is very frustrating. I want to search my notes, I never want to ask AI a question, through notion."

App Store · ★★ · 2026-08-09 · conf 51%

"I did pretty much exactly this and I think the problem is Notion. It has to go look at Notion, which it never instinctively does. Have Claude rebuild this in Obsidian or as a set of local files instead, then use Claude Code within that folder. <https://www.reddit.com/r/womenintech/comments/1wmojtc/comment/pb8y8ak> - -- **THE SETUP** I use Claude Code (the desktop app). I set up..."

"I first discovered notion through work and really loved it. So, I began using it for personal items I wanted to document. Ever since the whole platform started pushing AI and became an AI workspace it has done nothing but go downhill. Functions within the app and on desktop used to work flawlessly. Now I can't even do simple tasks without it acting buggy. I try to type in a ..."

App Store · ★★ · 2026-07-22 · conf 70%

"I use Things 🧑 It's so buttery smooth and stays out of my way. Helps me focus on the task at hand. There's just no other app out there that do deadlines and projects in the same smooth way Things do it. I've tried it all, but I always come back for those two features alone. I've solved the lack of attachments by pasting a link to the file/folder I need. If you enjoy the ..."
